**Composition**
Paragesic-C tablet: Each tablet contains Paracetamol BP 500 mg and Caffeine Anhydrous BP 65 mg.

**Pharmacology**
Paragesic-C is a combination of Paracetamol and Caffeine which is one of the safest and most widely used analgesic and antipyretic. Paragesic-C produces analgesic action by elevation of pain threshold and antipyresis through action on the hypothalamic heat regulating center. Paragesic-C exerts significantly milder side effects and most unlikely to produce many of the side effects associated with Aspirin and NSAIDs.

Paracetamol is rapidly and completely absorbed from the GIT following oral administration. The drug is extensively metabolized in liver and it has plasma half life of 1.5 to 3.0 hours. Paracetamol is not bound to plasma proteins to any extent.

**Indication**
- Fever
- Headache, toothache, earache, bodyache, myalgia, dysmenorrhea, neuralgia and sprains
- Rheumatic and Osteoarthritis pain

**Dosage and Administration**
*Adults & Elderly:* 1-2 tablets three to four times daily. Do not exceed 8 tablets in 24 hours.

*Children:* Not recommended for children under 12 years.

**Use in Pregnancy & Lactation**
*Pregnancy:* Paracetamol is safe in all stages of pregnancy and lactation.

*Lactation:* Paracetamol and caffeine are excreted in breast milk, so caution should be exercised when administered to a nursing woman.

**Side effect**
Side effects are significantly mild, though hematological reactions have been reported. Pancreatitis, skin rashes, and other allergic reactions occur occasionally.

**Contraindication**
Known sensitivity to Paracetamol.

**Overdose**
*Moderate overdose:* 4-10 gm/day
*Excessive overdose:* More than 10 gm/day

Liver damage may become apparent 12-48 hours after ingestion. In severe poisoning hepatic failure may progress to encephalopathy, coma and death.

**Storage**
Keep out of the reach of children. Keep below 30° C, protect from light.

**How Supplied**
Paragesic-C tablet: Box containing 10 x 10’s tablet in blister pack.
